

I oppose any weakening in the privacy law for Indiana. I enjoy my privacy and not having to answer the phone to have it be someone selling something and that sort of thing. I am disabled and like a lot of disabled people, I do not want to answer the phone and have my privacy interrupted with salespeople on the other end, or worse yet, a computer or no one. I have enjoyed my peace since the law has become into effect and would like for it to stay the way it is.
